Clinical Process Instruction Manual

Listing Patients on the TGLN Waiting List Process Instruction

Policy:

Ontario Health (Trillium Gift of Life Network (TGLN)) supports the listing of recipients on the TGLN deceased organ waiting lists. The relevant Transplant Recipient Coordinator or designate normally enters all new listings and status changes during regular business hours.

The Provincial Resource Centre (PRC) is available to complete urgent listings or status changes required outside of business hours for transplant programs, if required.

TGLN provides this service to the transplant programs; however, the transplant program is responsible for verification of the patient information during the following business day.

A Special Case Committee for Liver and Kidney may be required to review cases for which listing criteria fall outside of the standard criteria.

A completed Patient Listing Checklist, including the signatures of the lead physician, addiction psychiatrist and social worker is required prior to placing Alcohol-associated Liver Disease (ALD) patients on the liver wait list as part of the ALD Pilot Program.

Process:

During Regular Business Hours

- 1. The Transplant Program ensures the most current and correct clinical information is entered into the patient registration screen in the TGLN organ allocation and transplant system.
- 2. The Transplant Program is responsible for verifying the information in the patient's registration in TGLN organ allocation and transplant system.
- 3. If the Transplant Programs have a patient that needs to be considered for exception points or listing outside of the standard history criteria the case will be reviewed by the Special Case Committee. Transplant Programs will be required to complete a Special Case Committee request form and email <u>oh-tgln_specialcasecommittee@ontariohealth.ca</u>.

Clinical Process Instruction Manual

Listing Patients on the TGLN Waiting List Process Instruction

4. If the Transplant Program would like to list an ALD patient as part of the ALD Pilot Program, they must complete the Patient Listing Checklist and submit to TGLN via email at <u>OH-TGLN_transplant@ontariohealth.ca</u>. Once submitted, TGLN will verify receipt and completion of the checklist by 5:00 PM EST on the next business day. Upon TGLN verification, Transplant Programs may proceed to activate the patient on the liver wait list.

Outside of Regular Business Hours

All Patient Listings

- 5. A representative from the transplant program may request that TGLN change the status or register a new high-status/urgent listing patient to the waiting list(s).
- 6. The Transplant Program can submit the completed *Status Changes/Urgent Listings After Hours Form* to TGLN by email at <u>OH-TGLN_CSC@ontariohealth.ca</u>. See Exhibit 1.
 - 6.1. TGLN may also accept this information verbally on a recorded line. The Clinical Services Coordinator (CSC) will complete the *Status Changes/Urgent Listings After Hours Form* and enter the information into the TGLN organ allocation and transplant system on behalf of the Transplant Program.
 - 6.1.1. For patients requiring a new urgent listing, the CSC will select the urgent listing checkbox in both the recipient profile and the recipient's organ journey. Selection of the urgent listing checkboxes will update the recipient profile and journey by making many of the mandatory data fields optional.
 - 6.2. If the recipient is a new listing, the transplant program is also required to fax/email a hard copy of the patient's ABO type to the PRC prior to registration by TGLN.
- 7. The CSC receives the information above and completes the *Status Changes/Urgent Listings After Hours Form*, if required.
- 8. The CSC enters the information into the TGLN organ allocation and transplant system.
- 9. If the new/updated listing is a high-status listing, two (2) CSC's must verify the new/updated information in the TGLN database and initial on the *Status Changes/Urgent Listings After Hours Form.*

Clinical Process Instruction Manual

Listing Patients on the TGLN Waiting List Process Instruction

- 10. Upon completion of the new/updated listing, the CSC notifies the relevant Recipient Coordinator, providing the patient's name, TGLN # and status change or new listing information. The CSC may also send the completed Status Changes/Urgent Listings After Hours Form to the Recipient Coordinator.
- 11. The Recipient Coordinator is responsible for verifying new and revised patient information on the TGLN organ allocation and transplant system.
- 12. Once the updated or new listing information is verified by the Transplant Programs, the recipient coordinator will complete the verification section on the form and send it back to TGLN at <u>OH-TGLN_CSC@ontariohealth.ca</u> on the next business day.
- 13. The CSC saves a copy of the form for future upload to the TGLN organ allocation and transplant system.
- 14. The Team Lead on each shift is accountable for ensuring all staff are aware of any new high-status recipients listed.

ALD Patient Listings

- 15. If the urgent listing of an ALD patient is required as part of the ALD Pilot Program, Transplant Programs must first complete and submit the Patient Listing Checklist to TGLN via email at <u>OH-TGLN_CSC@ontariohealth.ca</u>. See Exhibit 2.
- 16. The CSC receives the Patient Listing Checklist and reviews it to confirm the completion of following:
 - 16.1. All patient information has been provided
 - 16.2. All checkboxes are checked
 - 16.3. All parties (lead physician, addiction psychiatrist and social worker) have signed and dated the checklist

Clinical Process Instruction Manual

Listing Patients on the TGLN Waiting List Process Instruction

- 17. If the Patient Listing Checklist is confirmed by the CSC to be completed, the CSC will respond to the Transplant Program via email and verify receipt and completion of the checklist. Once this is completed, the Transplant Program may proceed to submit the Status Changes/Listings After Hours Form to TGLN.
- 18. If the Patient Listing Checklist is not confirmed by the CSC (e.g., all checkboxes are not checked), the CSC will follow up with the Transplant Program to request that it will be completed. If the Patient Listing Checklist cannot be completed by the Transplant Program after CSC follow-up, then CSC is to notify the Clinical Transplant Systems Program Manager (Liver) and it will be addressed by them on the next business day.
